

Centennial Heights School Centennial Heights, Calumet Township, Michigan ca. 1910

Centennial Heights School - East Elevation
May 2004

20.0 feet

Orthophoto of front (east elevation), derived from a 3-D model of the entire structure, which was developed from over 60 photographs.

At the time of its demolition in 2004 this building was the largest remaining wood-framed school in the State of Michigan.

This larger structure was built around a smaller school house, completely enclosing it.
